ADOPTING CLOUD TECHNOLOGY IN THE LIFE SCIENCES

1st Strategic event for cloud users

With the rapid changing IT technology, the life sciences industry is facing challenges to remain in compliant while adopting new technologies, such as GxP SAAS solutions for the cloud.

More and more SAAS cloud solutions are offered to our industry, and this significantly changes our processes.

Sobi and Iperion would like to discuss the impact of these cloud solutions and also how our industry could adopt solutions that are not specifically designed for the life sciences. We hope this will be the first of many events in where we can elaborate with industry experts about their view on moving to and working in the cloud and to share our ideas, suggestions, and approaches.

Do you feel you can add some value to these discussions or learn from the way other companies adopting or not adopting the cloud? Then this is an event you cannot miss!

In our first session, we will discuss 2 topics:

1. SaaS solutions

What is important when selecting a SaaS provider? Are there additional requirements for SaaS providers? How do you think new IT technologies affect your IT department? Did you encounter issues with SaaS providers that influenced your GxP compliance?

2. Re-evaluation of classification of systems

The classification of systems might change when the system goes to the cloud. As categorization is based on GxP or non-GxP, aspects such as data integrity are getting more important as well. How is the categorization classified in your organization? Do you feel your current classification method is adaptable for cloud usage?

This event is **FREE** for all participants and applicable for all system owners, IT persons and other professionals who feel the event can contribute value to them.

There is only one prerequisite: you are working in the life sciences industry and have experience with the topics that we will be discussing. Life sciences consultants and software vendors are also welcome.

We are looking for interactive participants! [REGISTER HERE.](#)

AGENDA

09:00 - 09:30	Reception
09:30 - 10:00	Introduction
10:00 - 11:00	Interactive discussion challenges moving to the cloud
11:00 - 11:30	Coffee break
11:30 - 12:30	Interactive discussion challenges working in the cloud
12:30 - 13:30	Lunch
13:30 - 14:30	GxP Classification: can we make it more efficient?
14:30 - 15:00	Coffee break

ABOUT SOBI

Sobi™ is an international specialty healthcare company dedicated to rare diseases.

We also market a portfolio of speciality and rare disease products for partner companies across Europe, the Middle East, North Africa and Russia. Sobi is a pioneer in biotechnology with world-class capabilities in protein biochemistry and biologics manufacturing. In 2015, Sobi had total revenues of SEK 3.2 billion (USD 385 M) and approximately 700 employees. The share (STO:SOBI) is listed on NASDAQ OMX Stockholm.

More information is available at www.sobi.com.

ABOUT IPERION

IPERION® is a Dutch based company with over 10 years of experience in the life sciences industry. The three business units: Consultancy, Information Systems and GxP Cloud Computing, operate in the pharmaceutical, medical devices, biotechnology and health care sector. Focus points are IDMP consultancy, RA operations and support, ERP and Quality Management Systems implementation and IT services - GxP cloud computing for life sciences. IPERION® is ISO27001 and ISO 9001:2008 certified. Find out what our products and services can mean for your business.
